

Fabric Isolation in the Enterprise

- The art of surviving

Hasain.Alshakarti @truesec.se

Mikael.Nystrom @truesec.se

The Fabric?

*"Something that belongs to regular IT,
but can be moved."*

*"Something that can be abused to create a
major business impact."*

Identity

- Active Directory
- Azure Active Directory / Entra ID

Logging

- Immutable
- Off-site
- One-Way
- On-Prem / Cloud

Network

- Management Endpoints
- Firewall
- Proxy
- Switches
- VLAN
- Incident Mode
- Out-of-Band

Storage

- Administrative Interface
- Administrative Endpoints

Backup

- One-Way
- Off-Site
- Immutable
- Encrypted
- Management Interface
- Management Endpoints

Virtualization

- Management Interface
- Management Endpoints
- Self-Service
- Shielding

System Management

- Administrative Interfaces
- Administrative Endpoints
- High-Priv Exposure

Production IT

- Shared Resources
- Import/Export
- Crossover Access
- ERP (sample)
- Controlled Flow, in detail
